About This Document

The *Transformation Reference* identifies which Adobe® LiveCycle® Designer 10 properties are supported by various web browsers. Use this reference for forms that are developed in Designer and rendered in HTML by Adobe® LiveCycle® Forms 10.

Who should read this document?

This reference is intended for form developers who create forms that are rendered in HTML and who need to understand which Designer properties are supported by different browsers.

Additional information

In addition to this reference, the following resources provide information about Adobe® LiveCycle® Enterprise Suite (ES4).

<table>
<thead>

About Forms Transformations

The Transformation Reference is intended to be used for forms developed in Designer. Although forms designed for a browser environment support the majority of the objects that are available in Designer, they do not support all their properties in every type of browser. This reference lists all the objects and their properties, and indicates which properties are supported. This reference also lists the scripting properties, methods, and events for objects that support scripting.

Forms supports browsers that follow the CSS2 specification. Because browsers vary widely in their support of CSS2 and older browsers do not provide any support, several browsers and generic user agents have been targeted with their own specific transformation types. A special accessible transformation is also available for Microsoft® Internet Explorer 5.0 and later browsers. Internet Explorer browsers on the Apple® Mac OS® platform render as XHTML.

Note: Forms does not support tables in form designs that are rendered in HTML 4.

How to use this reference

This reference includes a table for each object that is available in the Standard library in Designer. The table lists the Designer properties and the Forms browser transformations.

The Forms browser transformations are listed across the top.

Note: XHTML, NoScript XHTML, and AHTML browser formats are deprecated in Forms 9. For information on properties, methods, and events supported by these transformations in LiveCycle Forms ES, see Transformation Reference (version 8.2).

### Formats supported

<table>
<thead>
<tr>
<th>Format</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>HTML 4 (Low end)</td>
<td>Older versions of browsers</td>
</tr>
<tr>
<td>MSDHTML</td>
<td>Microsoft Internet Explorer 5.0 and 6.0</td>
</tr>
<tr>
<td>Static HTML</td>
<td>Internet Explorer 6.0, 7.0 and FireFox 2.0, 3.0</td>
</tr>
<tr>
<td>Accessible XHTML</td>
<td>Internet Explorer 6.0, 7.0; FireFox 3.0; Netscape 8.0; and Safari 3.0</td>
</tr>
<tr>
<td>NoScript Accessible XHTML</td>
<td>Internet Explorer 6.0, 7.0; FireFox 3.0; Netscape 8.0; and Safari 3.0</td>
</tr>
</tbody>
</table>

Note: In some browsers, such as Internet Explorer, the user settings can override the font size, colors, and styles that are defined in a form design. In addition, some HTML 4 browsers, such as Netscape 4.0, do not support tabbing.

The browser support for each property, method, and event is identified as described in the legend.

### Legend

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Y</td>
<td>Implemented</td>
</tr>
<tr>
<td>N</td>
<td>Not supported by browser</td>
</tr>
<tr>
<td>(123)</td>
<td>Endnotes available</td>
</tr>
</tbody>
</table>
This document includes only those scripting properties, methods, and events that are available in HTML clients. For a complete list of the Adobe XML Form Object Model scripting objects, properties, and methods, see Designer Scripting Reference. For a complete list of the scripting events, including descriptions and examples, see Designer Help.
